WHAT IS CLAIMED IS:

A method for aggregating feedback, comprising:
 receiving a first set of travel information including information
 identifying a traveler, an itinerary of said traveler, and at least one travel
 service provider scheduled to provide services to said traveler;

automatically generating a feedback request based on said first set of travel information and requesting specific feedback regarding said at least one travel service provider;

transmitting said feedback request to said traveler; receiving feedback information from said traveler; and analyzing said feedback information received from said traveler.

2. The method of claim 1, wherein said first set of travel information is received from a travel organizer.

3. The method of claim 2, wherein said analyzing further comprises: determining whether at least a portion of said feedback information should be provided to said travel organizer.

4. The method of claim 1, wherein said automatically generating further comprises:

comparing a travel completion date from said first set of travel information to a current date; and

generating said feedback request when said current date is after said travel completion date.

5. The method of claim 1, wherein said automatically generating further comprises:

determining a type of said at least one travel service provider; and

generating said feedback request based on said type.

- 6. The method of claim 4, wherein said type is one of at least an airline, a car rental, a hotel, and a travel agency.
- The method of claim 1, wherein said analyzing further comprises:
 determining whether said feedback information includes a complaint.
- 8. The method of claim 7, wherein said analyzing further comprises: determining whether said complaint requires a response from said at least one travel service provider.
- 9. The method of claim 8, wherein said analyzing further comprises: monitoring said complaint to determine whether a satisfactory response from said at least one travel service provider has been received.
- The method of claim 1, wherein said analyzing further comprises:
 determining whether said feedback information includes a complaint.
- 11. The method of claim 1, wherein said analyzing further comprises: determining whether at least a portion of said feedback information should be provided to said at least one travel services provider.
- 12. A computer-implemented method for aggregating feedback, comprising:

receiving a first set of travel information including information identifying a traveler, an itinerary of said traveler, and a plurality of travel service providers scheduled to provide services to said traveler;

generating a feedback request form for each of said plurality of travel service providers, requesting specific feedback based on each of said plurality

5

of travel service providers;

generating a summary feedback request form requesting general feedback for said itinerary and each of said plurality of travel service providers;

transmitting each of said feedback request forms and said summary feedback request form to said traveler;

receiving feedback information from said traveler, including completed ones of said feedback request forms and said summary feedback request form; and

analyzing said feedback information received from said traveler.

- 13. The computer-implemented method of claim 12, wherein said first set of travel information is received from a travel organizer.
- 14. The computer-implemented method of claim 12, wherein said analyzing comprises:

reviewing information from each one of said feedback request forms and said summary feedback request form to determine whether any resolution is required.

15. The computer-implemented method of claim 12, wherein said analyzing comprises:

determining whether said feedback information received from said traveler includes a complaint.

16. The computer-implemented method of claim 12, wherein said analyzing comprises:

determining whether said feedback information received from said traveler includes a request for a response.

17. The computer-implemented method of claim 16, further comprising: generating a request for a response from one of said travel service providers; and

monitoring said request for a response to determine if said travel service provider properly responds.

18. An apparatus for aggregating feedback, comprising:

means for receiving a first set of travel information including information identifying a traveler, an itinerary of said traveler, and at least one travel service provider scheduled to provide services to said traveler;

means for automatically generating a feedback request based on said first set of travel information and requesting specific feedback regarding said at least one travel service provider;

means for transmitting said feedback request to said traveler; means for receiving feedback information from said traveler; and means for analyzing said feedback information received from said traveler.

19. An apparatus for aggregating feedback, comprising:

a processor; and

a storage device in communication with said processor and storing instruction adapted to be executed by said processor to:

receive a first set of travel information including information identifying a traveler, an itinerary of said traveler, and at least one travel service provider scheduled to provide services to said traveler;

automatically generate a feedback request based on said first set of travel information and requesting specific feedback regarding said at least one travel service provider;

transmit said feedback request to said traveler;

traveler.

10

receive feedback information from said traveler; and analyze said feedback information received from said

20. A machine-readable medium having stored thereon data representing sequences of instructions, said sequences of instructions which, when executed by a processor, cause said processor to:

receive a first set of travel information including information identifying a traveler, an itinerary of said traveler, and at least one travel service provider scheduled to provide services to said traveler;

automatically generate a feedback request based on said first set of travel information and requesting specific feedback regarding said at least one travel service provider;

transmit said feedback request to said traveler;
receive feedback information from said traveler; and
analyze said feedback information received from said traveler.
